

Settlement payment processing  
annually costs the insurance  
industry more than **\$30M**

SES<sup>®</sup> can reduce that to **\$0**

## Settlement Exchange System<sup>®</sup> (SES<sup>®</sup>)

SES<sup>®</sup> facilitates both the automated issuance of EFTs and the processing of incoming subrogation and arbitration payments made via EFT, once settlement is reached between members. SES<sup>®</sup> is available for E-Subro Hub and Total Recovery Solution<sup>®</sup> (TRS<sup>®</sup>) transactions. Best of all, it's available to AF members at no cost.

Eliminates the need for manual data entry and the time-consuming process of issuing checks to settle claims

Eliminates expenses associated with tracking and investigating lost checks and payment mismatches

SES<sup>®</sup> members use their claim and financial systems to issue claim-related EFT payments to third-party carriers. In doing so, they retain the necessary payment authorization logic already built into their systems. AF has no direct involvement in banking transactions.

SES<sup>®</sup> features a payment aggregation option that allows netting of resolved claims among participants. This new option gives participating member companies the flexibility to determine the cadence of EFT payments and processing of incoming subrogation and arbitration recoveries.
